# PROGRAM

**Chair :**        **D. Beelen, F. Locatelli**

2:30 pm	Welcome and introduction	<b>F. Locatelli</b> Rome, Italy
2:40 pm	Improved survival of AML and MDS patients after allogeneic HSCT. Final results of a randomised clinical phase III trial with 570 patients treated with treosulfan vs. busulfan-based conditioning.	<b>M. Stelljes</b> Münster, Germany
3:00 pm	Current treatment options with treosulfan-based conditioning for patients indicated for MUD or haploidentical HSCT.	<b>F. Ciceri</b> Milan, Italy
3:20 pm	Conditioning of paediatric patients with haematological malignancies. Prospective clinical phase II trial results with treosulfan-based conditioning.	<b>K. Kalwak</b> Wrocław, Poland
3:35 pm	Conditioning of paediatric patients with non-malignant diseases. Current clinical experience with treosulfan based-conditioning.	<b>M. Slatter</b> Newcastle, UK
3:50 pm	Conclusion	<b>D. Beelen</b> Essen, Germany
